## TECHNICAL SPECIFICATIONS AND OTHER TERMS

### 1. DELIVERY OF EQUIPMENT

The electronic controllers will be delivered to the Central Warehouse of Sepolia Depot at 94 Kifisou Avenue, Athens, during working days, Monday to Friday and between the hours of 8am to 11am. One week before delivery, a telephone consultation with the Rolling Stock Technical Support Directorate should be made, in order to determine at the same time, the date of installation on the first train.

### 2. DELIVERY TIME

No later than 6 weeks from the date of award of the procurement.

### 3. GUARANTEE OF GOOD OPERATION

The warranty period of the system is 12 months from the date of commissioning.

### 4. SUBJECT MATTER OF THE CONTRACT

The project of the Contractor-company CONSIBUS, official representative of DELIMON construction company in Greece, is the installation study and supply of 6 electronic controllers type 76951D005 of BIJUR DELIMON together with their mounts, accessories and mounting supports for the detection of curve track (Curve detection and wheel flange spray enhancement system P/N SYS20240322), in the existing automatic wheel nail lubrication system on series I trains of lines 2 and 3. At the same time, it will provide face-to-face training-guidance for the installation of the first of them, on a train at the Sepolia Depot of STASY. The exact operation and adjustment of the system will be finalized after the pilot application in the first train.

### 5. SAFETY

During the supervision of the installation of the first unit, the Contractor has the obligation to apply the regulations and procedures of STASY that will be notified to him and are related to the scope of the contract and the execution of the works, but also to safety issues.

### 6. ACCOMPANYING DOCUMENTS

Technical data sheets with detailed information on technical characteristics

The operation and maintenance manual of electronic controllers in Greek and English.

Installation instructions and electrical connection scheme of the electronic controller

Certificate and warranty terms

### 7. FIRST PLACEMENT - TRAINING

The placement of the first auditor will take place under the guidance of a specialized representative of the Contractor at the Sepolia Depot and after prior arrangement. The language of communication will be Greek and will take sufficient time to fully understand how to install and test operation. Also, the necessary instructions for the operation and maintenance of the controller will be given and any questions of STASY's staff will be resolved. At the end of the training, a relevant form will be signed for the documentation of its implementation, which will be signed by the representative - trainer of the Contractor and the participating trainees on behalf of STASY.

## GENERAL PROCUREMENT TERMS & CONDITIONS

**All quotations should be followed by the following information:**

- Valid period of quotation (at least ninety (90) days)

- Delivery time
- Transportation
- Estimated transportation cost
